12V White Radial 5-LED Reverse Polarity	N/A	0927-G02844		N/A

Gamesman recommends Single Axial Central LED Option for Controllable Halo Versions & 5 Radial x LED Option (1 central and 4 side firing) for non-Controllable Halo Versions

For more details see the Gamesman Specification sheet for this button.

[GPB1210.xls](#), and details of various switch connection systems.

## Accessories and Options

### Halo Boards

Halo boards are separately powered LED PCBAs that are specifically mounted to the button of a button, for the purpose of illuminating the outer bezel. For multicolour RGB illumination, Gamesman recommends using Opal Bezels for this purpose. Additional Sleeves and screws are required to mount and illuminate the Halo Board correctly.

Part Number	Type / Colour
<a href="#">0927-G02370</a> 	<b>RGB – Memory – Pre-Programmed – 5v (Option 1)</b>  This option consists of a memory chip located on the halo PCBA itself. This chip contains a pre-determined, pre-programmed LED sequence uploaded at the time of manufacture so that when voltage is applied, the PCBA automatically runs this sequence. As there is no independent 'control' of the LEDs this only has a 2pin connector – power and ground.
<a href="#">0927-G02373</a> 	<b>RGB – Without Memory – Controllable from External Source - 5v (Option 2)</b>  This option does not have the memory chip on board and as such will not automatically run a sequence when voltage is applied. However, it does have a 7way connector with pins that allow the customer to control the LEDs independently using their own LED controller board, via serial communication.

### Panel Mounting Options

The GPB1200 Series buttons feature Panel Mount clips that will secure the button to a metal panel up to 2mm thick (Including any additional coating or finish), with no additional hardware required. For customers who would like to use an additional Halo Board (See above), Gamesman can advise and supply sleeves and screws for a customer's cabinet.

#### Details of Securing the Sleeve, PCBA and Screw to Button

- 1) Insert Button into the panel from the front of the machine.
- 2) Lining up the fixing holes up in the Bezel, Sleeve and (optional) Halo PCB, use the screws provided to secure the Sleeve from the rear of the panel.
- 3) Lastly, snap the switch holder into the bezel.

#### Sleeve and Screws Only

In addition to securing the Halo PCBA, the sleeve and screws can also be used by themselves to provide further security to thicker panels. Maximum allowances for this button per switch system is as follows:

K1	K2	K3	K7
8mm	7.5mm	8mm	5mm

Tools

<p>Extraction Tool for Button Order Part Number GMP02372</p>	<p>Insertion/Extraction Tool for K1, K2 and K3 Switch Order Part Number GMP02791</p>
	

## **Additional Ordering Details**

### **Specification Sheet**

Click the link below to complete a specification sheet of your requirements. If you have any questions regarding your options that are not covered in this document, please contact our Sales team.

[GPB1210.xlsx](#)

### **Packaging**

Standard Packaging format for these buttons:

For Buttons **without a Halo Board, Sleeves or Screws:**

Lens & Legend Packed Separately in Bulk  
Switch Connection System Assembled to the Button  
Button Assembly Packed in Trays

For Buttons **with a Halo Board, Sleeve or Screws:**

Lens & Legend Packed Separately in Bulk  
Switch Connection System to be loosely fitted into button  
Button/Switch Assembly Packed in Trays  
All Halo parts packed in bulk as kit of parts PER BOX (Sleeve, Screws & LED PCBA)

For any deviations from this please refer to specification sheet.

### **Space Models**

3D CAD models link here, for other combinations please contact our Sales team.
