

Do you think someone has a copy of your keys?

Have you lost your keys?

In many cases, the safety of your vending machines is threatened due to the loss of key control. In these cases, you need to restore safety by changing the locks with inevitable costs, inconvenience and wasted time.

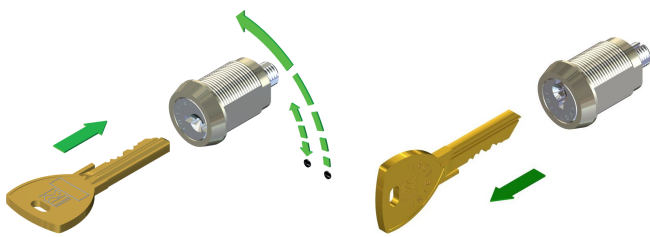

Rielda locks offers you an innovative and extended range of levers locks, for T handles and mechanically Re-Programmable and capable of solving, in a quick and simple manner, all the problems linked to safety and control of your keys.

Do you need to manage sets of locks?

Lever, T handle and mechanical Re-Programmable locks provide you with an equally important solution to manage sets of locks. Finally, you can manage your vending machines with a single and unique key for each zone!

Rielda Re-Programmable locks allow you to change the key used with a completely different one without replacing the locks. Simply half turn the Programming key to change the combination of the lock and cancel the previously used key. There's no need to dismantle the lock from the support.

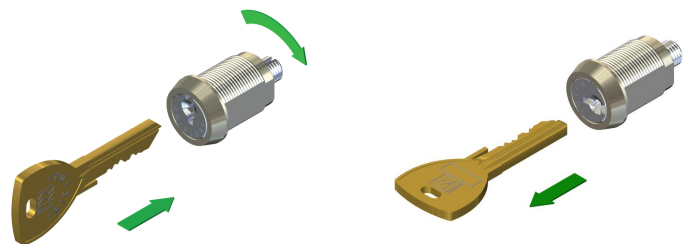

PROGRAMMING

- Insert the gold programming key
- Swing the key
- Rotate the key to the vertical position

- Remove the key
- The lock is now programmed. Put away the gold programming key in a safe place and use the silver key

RE-PROGRAMMING

- Insert the gold programming key
- Rotate the key (from the vertical position to the horizontal position)

- Remove the key
- The lock is now ready to be programmed with a new key

The keys are sold in kits with 1 "programming" key (gold) and a number of "use" keys (silver) as needed. When sold, a key code is assigned to you and only can ask for copies of that code.

Duplication of the keys is forbidden since the keys are subject to patent

It will be very simple for you to disable keys that lost or unreturned keys, duplicated without authorisation or in the wrong hands. Most vending machine manufacturers choose Rielda Locks take a good look at the machines you own, you may already have Rielda Re-Programmable Locks, but you don't know it
